

Bug in automysqlbackup script

Stefan Hornburg (Racke)

2007-06-14

There is a bug in the MySQL Backup Script v2.5 from <http://sourceforge.net/projects/automysql-backup/>, triggered by database name containing spaces. I fixed it by using quotes in the dbdump function:

```
# Database dump function
dbdump () {
mysqldump --user=$USERNAME --password=$PASSWORD --host=$DBHOST $OPT "$1" > "$2"
return 0
}
```
