

Create Favicon Icon for Website on Debian

Stefan Hornburg (Racke)

2008-02-07

First you need to convert the image to PNG format, e.g. with ImageMagick's `convert` (Debian package `imagemagick`):

```
convert logo.jpg -resize 32x32 favicon.png
```

In the second step you convert it to a Favicon with `icotool` (Debian package `icoutils`):

```
icotool -c -o favicon.ico favicon.png
```
